

MICHELIN X[®] TWEEL[™] TURF

AIRLESS RADIAL TIRES FOR ZERO TURN RADIUS MOWERS

ELIMINATES THE COMMON PROBLEMS OF UNSEATED BEADS AND FLAT TIRES ON ZERO TURN RADIUS MOWERS

- Designed to increase productivity by eliminating downtime caused by flat tires or unseated beads.
- Helps reduce maintenance time vs. pneumatic tires because there is no air pressure to check or adjust.
- Long tread life designed to last 2-3 times that of pneumatic tires due to a high-quality Michelin tread compound and an optimized contact patch.
- Engineered for a smooth ride and enhanced operator comfort – designed to work like a suspension for your mower and deck without the bounce of air-filled tires.
- Helps provide even cuts thanks to a consistent deck height.
- Outstanding side hill performance due to excellent lateral stability.
- Tweel[™] Casters help reduce mower deck vibration and fork damage compared to solid and semi-solid casters.

MICHELIN X® TWEEL™ TURF

AIRLESS RADIAL TIRES FOR ZERO TURN RADIUS MOWERS

AVAILABLE IN SIZES TO FIT A WIDE RANGE OF MOWERS

✓ 13X6.5N6 ✓ 15X6.0N6 ✓ 18X8.5N10 ✓ 22X11N12 ✓ 24X12N12 ✓ 26X12N12

Rear Drive Position

Front Casters

13" Grooved Polyresin Tread

13" Smooth Polyresin Tread

15" Smooth Polyresin Tread

MAJOR COMPONENTS

1. Tread design optimized to minimize turf damage while providing excellent traction and a long service life.
2. Zero degree belts (under the tread) and proprietary design provide great lateral stiffness, while resisting damage and absorbing impacts.
3. Michelin's proprietary Comp10 Cable™ forms a semi-rigid "shear beam", and allows the load to hang from the top.
4. Heavy gauge steel hub designed to fit on a variety of popular mowers.
5. High strength, poly-resin spokes carry the load and absorb impacts, help dampen the ride, and provide a unique energy transfer that reduces pneumatic bounce.
6. Durable, polyresin tread helps provide a long wear life.
7. Integrated metal center hub with OEM quality sealed bearings, available for 5/8" and 3/4" diameter axle bolts. Spacers are available to adapt fit for a variety of popular mowers.
8. Unique circular outer beam functions like a spring, creating suspension like characteristics for the front of the mower.
